

RichBlack.txt

This 4-color combination produces a neutral rich black, not too warm or cool.

Black - 95%

Cyan - 76%

Magenta - 67%

Yellow - 70%

Note that it is not recommended to build a rich black with 100% of all the colors, as this increases the ink density higher than the optimal standard, and can result in hickeys, offsetting, and other blemishes on-press.
